SUMMARY

Python and AI Full-Stack Developer with hands-on experience in web development, backend APIs, databases, and Generative AI. Skilled in building scalable, AI-powered solutions and passionate about solving real-world problems and turning ideas into practical software solutions.

WORK EXPERIENCE

Full-Stack Developer Intern — Hooman Groups

August 2025- April 2026

- Built and integrated RESTful APIs for authentication, product management, and core workflows using Node.js, Express.js, TypeScript, and PostgreSQL (NeonDB).
- Cut database query latency by 20% via indexing optimization, connection pooling, and API route refactoring, boosting overall application responsiveness.
- Partnered with Web, Android, and iOS teams to ship backend services and real-time features, following Git/GitHub-based development workflows.

SkillCraft Technologies — Web Developer

May 2025- June 2025

- Built reusable React.js components and debugged frontend functionality to improve usability, responsiveness, and cross-browser compatibility.

PROJECTS

AI-Powered RAG Chatbot

[Link to Demo](#)

- Built an end-to-end RAG pipeline for document-based question answering using document chunking, embeddings, semantic search, and ChromaDB vector retrieval.
- Developed FastAPI REST endpoints with LangChain to integrate document retrieval with LLM-based response generation; testing and debugging embeddings, vector database integration, and API components..

BloodConnect — Smart Blood Donation Platform

[Link to Demo](#)

- Built a full-stack blood donation platform connecting donors, hospitals, and recipients, with matching based on blood group and geographic proximity.
- Developed RESTful APIs and backend services using Express.js and PostgreSQL for donor management, blood requests, notifications, and application workflows.

EDUCATION

B.Tech 4th year, Computer Science and Engineering at **Sphoorthy Engineering College** (CGPA: 9.21/10)
Expected Graduation: 2027

SKILLS

Programming Languages : Python, JavaScript (ES6+)
AI & Generative AI : LLMs, RAG
Backend & APIs : FastAPI, REST APIs, API Integration
Frontend : HTML5, CSS, React.js, Tailwind CSS
Databases : SQL, PostgreSQL, NeonDB
Core Concepts : Data Structures & Algorithms, Object-Oriented Programming, DBMS, Problem Solving
Tools & Version Control : Git, GitHub, VS Code, Vercel

CO-CURRICULAR ACTIVITIES

36-Hour Hackathon	Participated at Sphoorthy Engineering College
2nd Place – Blind Code Competition	Tech Fest at Sphoorthy Engineering College
2nd Place – Technical Quiz	Sphoorthy Engineering College
